Product Name:

Dual low offset, low power operational amplifier

Special Features:

Low input offset voltage: 75 uv , low offset voltage drift, over-55 c <ta< +125c o.5uv/ c , low supply current (per amplifier): 725 ua , stable with large capacitive loads: 10 nf typical

Supplementary Features:

Monolithic dual operational amplifier to offer op77 type precision performance, power consumption of the op200 is low, with each amplifier drawing less than 725 ua of supply current

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A458a0
