Overall Length:

4.000 inches

Overall Width:

3.000 inches

Special Features:

Accepts 12-42 vdc power supply; 0.4 - 3.5 amps switch selectable motor current; 12, 800 steps/rev; step motor drive; 2 speeds: selectable from external signal; on-board trimpots for all settings; 3 state mosfet pwm amplifiers; 4 optically isolated 5.24v digital inputs can be configured for sinking or sourcing tape; enable input; optically isolated tech out signal; drives 4.6 or 8 lead step motors, sizes 14-34; thermal protection; screw terminal connectors; driver contains a microstep phase sequencer, two switching amplifiers and optoisolation circuits

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A51110
