Overall Length:

0.880 inches

Overall Height:

0.400 inches

Overall Width:

0.505 inches

Operating Temperature Range:

-55.0/+125.0 degrees celsius

End Application:

Nuclear power plant

Basic Shape Style:

Rectangular or square

Inclosure Type:

Hermetically sealed

Circuit Construction Type:

Solid state

Individual Step Frequency:

17.5 megahertz

Connection Type And Location:

Printed circuit bottom

Connection Contact Type And Quantity:

14 printed circuit internal

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A32200
