Inclosure Type:

Encased

Circuit Construction Type:

Solid state

Special Features:

Dc electronic load module; 500 watt; 0 to 60 amp current; 0 to 150 vac; must operate w/mainframe; requires 2 slots on n3300/n3301a mainframes; w/auto execute; programmable delay; cc, cv or cr modes; measures current, power, voltage, and digitizes waveforms

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A32200
