End Application:

Meltem acoustic segment

Product Name:

Atsg module assembly.

Special Features:

Generates fm stimuli used to modulate the rf self test generator on the bite rf module; provides the capability to evaluate the quality of the baseband outputs by performing signal to noise measurements on the individual receiver modules; generates sonobuoy test pattern signals for performing end to end testing of the aircraft acoustic system; used for internal bit functions only

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A32200
