End Application:

Nha 20kv tank, milstar

Special Features:

When used in an hvps system, the rectifier module receives, as its input a 40 khz square wave of about 340vp-p. It produces on its output terminals about 4000 vdc. The current capability is about 140ma dc. The withstanding voltage from secondary to primary is greater than 25kv. This allows up to 5 rectifier modules to be safely put in series.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A32200
