Inclosure Material:

Plastic

Average Life Measurement:

Not rated

End Application:

2002334 (05nf7), generator set 60kw w/trlr

Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Installation Design:

Module

Circuit Construction Type:

Solid state

Operating Ac Frequency In Hertz:

60.0 single voltage

Product Name:

Transducer, ac, 0-100

Phase:

Three

Special Features:

Input 120/208 volts, 3 phase, 4 wire, 60 hz slef powered working range; output 0-1 ma < 7500 ohms < 27 volt maximum open voltage; elements: 2.5; case material: gray polycarbonate per ul94v0; connection terminals: corrosion resistive screws with captive washers; range 0-100 kw

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A32200
