Overall Length:

3.700 inches

Overall Height:

1.800 inches

Overall Width:

1.890 inches

Basic Shape Style:

Rectangular or square

Circuit Construction Type:

Any acceptable

Special Features:

Consists of two igbt transistors in a half-bridge configuration with each transistor having a reverse connected superfast recovery free wheel diode

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A32200
