**Overall Length:**

3.700 inches

**Overall Height:**

1.800 inches

**Overall Width:**

1.890 inches

**Basic Shape Style:**

Rectangular or square

**Circuit Construction Type:**

Any acceptable

**Special Features:**

Consists of two igbt transistors in a half-bridge configuration with each transistor having a reverse connected superfast recovery free wheel diode

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A32200
