Overall Length:

4.200 inches

Overall Height:

1.080 inches

Overall Width:

3.120 inches

Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Circuit Construction Type:

Solid state

Frequency Per Channel:

0.0 kilohertz input channel and 25.0 kilohertz input channel

Signal Data Type Per Channel:

1st output channel analog voltage and 2nd output channel analog voltage

Product Name:

Din-rail frequency to analog converter

Color:

Black

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A32200
