Overall Length:

3.937 inches

Overall Height:

2.520 inches

Overall Width:

0.472 inches

Circuit Construction Type:

Solid state

Special Features:

Number of outputs: 4 , current consumption maximum (internal) 125ma, signal voltage: 0-10v, resolution: 12bit, voltage supply: via system voltage dc/dc, data size 4x16 bit data, 4x8 bit controller, operation temp: 0.0 to +55.0 degrees celsius

Type/model Designation:

750-559

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A32200
