End Application:

Lead-in lighting system (ldin)

Product Name:

Digital input module; cca

Special Features:

The snap-idc5d provides four channels of 2.5-28 vdc digital input. Each channel senses the on/off status for dc voltages from sources such as proximity switches, push buttons, or auxiliary contacts. The module has removable top-mounted connectors for easy access to field wiring, as well as channel-specific leds for convenient troubleshooting

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
