**Frequency Rating:**

Between 0.2 kilohertz and 2.0 kilohertz

**Switch:**

Not included

**Dc Resistance Rating In Ohms:**

28.0

**Impedance Rating:**

300.0 ohms

**Earphone Element Type:**

Magnetic

**Earphone Quantity:**

1

**Controlling Agency:**

Western electric co inc

**Identifying Number:**

N-1 model no.

**Operating Current Rating:**

100.0 milliamperes

**Earphone Impedance Rating:**

256.0 ohms

**Earphone Controlling Agency:**

Western electric co inc

**Earphone Identifying Number:**

Hc-3 model no.

**Microphone Element Type:**

Carbon

**Output Level Rating:**

38 db above 1 mw at 28 dynes per sq centimeter

**Earphone Mounting Method:**

Suspended on headband

**Microphone Mounting Facility:**

Adjustable boom secured to receiver

**Connector Name:**

Test clips

**Connector Identifying Number:**

3 model no.

**Connector To Junction Cord Length:**

7.000 feet

**Connector Controlling Agency:**

Western electric co inc

**Special Features:**

A 516a capacitor is included as an integral part of the cord and is used in testing telephone cable pairs without causing interference
