End Application:

Lecternette, sound-craft systems, inc., models I56b, I46b and I16b

Product Name:

Add-on speaker set

Functional Description:

Designed to extend voice amplification to larger groups or to conquer unusual acoustical problems.

General Description:

Each set consists of two sections, each containing a speaker column and 50 feet of cable; the sections snap together and have a handle at the top for convenience in carrying the set; the a06 may be mounted on tr50a tripod stand (not included); there is storage space for the tripod stand in the back of each section of the loudspeaker set.
