Width:

12.7 millimeters

Length:

44.7 millimeters

Output Sensitivity Rating In Decibels:

-32.0 and -26.0

End Application:

B-52 top kit

Special Features:

Material: pc+asa, (copper with a pvc coating)black: item is an electret aviation microphone fo use on military aircraft: part marking shall be as shown on figure 1 of ssd-2613-b2-800 and shall include the tt52-a part number designation. The manufacturing date code in shall be in wwwyyy format: the item shall operate without degradation with electircal power of 8 to 16 volts directcurrent when connected according to figure 3. The input power is less than 400 mw.

Height:

10.5 millimeters

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A06400
