Electrical Insulation Sleeving - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/5970-00-834-4579

Wall Thickness:
Any acceptable
Dielectric Withstanding Voltage In Volts:
7000.0
Reliability Indicator:
Not established
Inside Diameter:
Between 0.040 inches and 0.049 inches
Overall Length:
Between 2.500 feet and 3.500 feet
Tempurature Rating:
200.0 degrees celsius
Coating Material:
Silicone varnish
Environmental Protection:
Any acceptable
Impregnation Material:
Silicone varnish
Flexibility:
Flexible
Color:
Black
Material:
Glass braid, mil-i-3190, class h-a-1
Style Designator:
Nonshrinkable
Specification Or Standard:
H-a-1 class and 18awg size
Departure From Cited Designator:
As modified by color
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A22500
