Reliability Indicator:

Not established

Tempurature Rating:

-13.0 degrees fahrenheit

Environmental Protection:

Corrosion resistant and flame resistant and mildew resistant and water resistant

End Application:

5970-01-357-5012

Min. Tensile Strength (psi):

1500 pounds per square inch

Flexibility:

Flexible

Color:

Blue

Material:

Plastic, polyolefin, mil-i-23053/5

Style Designator:

Shrinkable

Dielectric Material Voltage Rating Per Unit Thickness:

500.0 volts per military /0.001 inch/

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A22500
