Electrical Insulation Sleeving - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/5970-01-521-7485

## Wall Thickness:

0.065 inches

**Reliability Indicator:** 

Not established

# Inside Diameter:

Between 0.625 inches and 0.655 inches

### **Coating Material:**

Rubber or resin, synthetic

#### **Environmental Protection:**

High humidity resistant

## Design Form:

Full round

#### Flexibility:

Flexible

## Color:

White

## Material:

Silicone rubber

## Material:

Rubber silicone class q

### Style Designator:

Nonshrinkable

## **Departure From Cited Document:**

Material will be in accordance with ships parts control center activity hx quality control, manufacturing and testing specifications

### Shelf Life:

N/a

#### Unit Of Measure:

---

## Demilitarization:

No

#### Fiig:

A22500
