Wall Thickness:

0.065 inches

Reliability Indicator:

Not established

Inside Diameter:

Between 0.625 inches and 0.655 inches

Coating Material:

Rubber or resin, synthetic

Environmental Protection:

High humidity resistant

End Application:

Filters

Design Form:

Full round

Product Name:

Insulation sleeving, electrical, flexible, coated, class 200, type d, category c

Flexibility:

Flexible

Color:

Black

Material:

Silicone rubber

Material:

Rubber silicone class q

Style Designator:

Nonshrinkable

Departure From Cited Document:

Material will be in accordance with ships parts control center activity hx quality control, manufacturing and testing specifications

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A22500
