Wall Thickness:

0.025 inches

Inside Diameter:

0.750 inches

Tempurature Rating:

56.0 degrees celsius

Product Name:

Silicone resin coated fiberglass sleeving

Special Features:

Two different grades of sleeving are offered identified by average dielectric breakdown voltage: , nema grade a-8000 volts min average 6, 000 volts min individual, nema grade c-1-2500 volt min. Average 1, 500 volts min. Individual, size 1

Color:

Brown

Style Designator:

Nonshrinkable

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A22500
