General Description:

Material is diallyl phthalate, test voltage is 1000 vac-rms at sea level, insulation resistance shall be greater than 1000 megohms when tested, temperature range is minus 65 c to plus 125 c, environmental requirements are temperature cycling, moisture resistance, vibration, shock, 1.500 in. Lg, 0.320 in. W, 0.288 in. H

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
