Overall Height:

7.000 inches

End Application:

Eh101 helicopter

Product Name:

Modular power system

Special Features:

High density, eight slots in 7 inches of rack space; output sequencing; low ripple noise; high-accuracy read-back of voltage and current over gpib; standard commands for programmable instruments, scpi; optional keyboard and display unit; serial link to connect two mainframes at on gpib address; optional isolation and polarity-reversal relays; built-in self-test

Functional Description:

Accommodates up to eight dc power modules

Style Designator:

Enclosed vertical front two sections

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A05500
