End Application:

Ecp secp-9353-51015318; modified cable support j1a-j2a electrical harness tf-40b engine.

Material And Location:

Steel, corrosion resisting

Design Type:

Any acceptable

Product Name:

Inavy: cable, support

Special Features:

Non-skid paint or an adhesive anti-skid material shall be applied to the top deck. Tech manual s9234-dk-mm0-010. This part is a substitute for part number 0-183-013-07. Purpose is to replace the current cable harness with a stiffer bracket capable of supporting the technicians weight. The modified part will provide better protection of the j1a-j2a cables while providing a stable stepping area if needed during maintenance.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
