End Application:

An/tpq-37

Unpackaged Unit Weight:

4.000 pounds

Special Features:

Fabricated from 6061-t4 aluminium, class iii chemfilm finish. Height: 24.000 inch, width: 6.000 inch, depth: 5.000 inch

Functional Description:

A passive copper cable cross connect unit that enables the distribution of control signals and digital data signals coming from power amplifier modules (pam) to the transmitter control unit (tcu)

Material:

Aluminum

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A17600
