

View Online at <https://aerobasegroup.com/nsn/5980-01-083-8939>

Inclosure Material:

Plastic

Semiconductor Material:

Gallium arsenide phosphide

Maximum Operating Temperature Per Measurement Point:

100.0 degrees celsius ambient air

Special Features:

Two lead mtd; used as indicator lights; 80 mw power dissipation at 25 degrees ambient; 35 ma continuous fwd current; 5 v reverse voltage

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A110a0
