General Description:

Two channel npn silicon planar phototransistor optically coupled to a gallium arsenide diode; two packages fit into 16 lead dual-in-line socket; operating temp range minus 55 to 100 degrees c; input diode forward current 60 ma, reverse voltage 3.0 v; 0.410 in. Maximum lg; 0.270 in. Maximum body w; 0.175 in. Maximum body h; wire lead terminals

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:
