General Description:

8 pin dual-in-line pkg; two isolated channels; power dissipation at 25 degrees c 150 milliwatt; collector-emitter breakdown voltage 30 volts; forward current 100 milliamperes; operating temperature minus 55 degrees c to plus 100 degrees c; 0/a length 0.380 in; 0/a width 0.240 in min. And 0.260 in. Max; height 0.130 in

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23900
