**Storage Temperature Range:**

-55.0/+125.0 degrees celsius

**General Description:**

Glass and metal hermetic sealed case; input diode reverse dc voltage 3.0 volts; forward dc current 50.0 ma; power dissipation 75.0 mw; output sensor collector-emitter voltage transistor 30.0 v; darlington 15.0 v; collector dc current 30.0 ma for both; power dissipation 75.0 mw for both; operating temperature range from minus 55.0 degree celsius to plus 100.0 degree celsius; 0.625 in. Lg; 0.250 in. W; 0.250 in. H

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A23900
