Storage Temperature Range:

-55.0/+150.0 degrees celsius

General Description:

Plastic dip photocoupler; electrostatic discharge sensitive device; reverse voltage for diode 6.0 volts; collector to emitter voltage for transistor 40.0 volts; forward current for diode 80.0 ma; collector current for transistor 160.0 ma; power dissipation for diode pd 120.0 mw; power dissipation for transistor pc 160.0 mw; operating temperature range from minus 55.0 degree celsius to 100.0 degree celsius; 0.780 in. Lg; 0.256 in. W; 0.138 in. H; sixteen pin type terminals 0.116 in. Min lg

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23900
