Inclosure Material:

Plastic

Overall Length:

0.670 inches

Overall Diameter:

0.280 inches

Lens Transparency:

Translucent

Mounting Method:

Terminal

Semiconductor Material:

Gallium indium arsenic phosphide

Voltage Rating In Volts Per Characteristic:

24.0 base supply voltage

Color Tone Produced Per Source:

Red semiconductor

Luminous Intensity:

85.0 microcandela

Special Features:

Midget flange based led

Terminal Type And Quantity:

1 ferrule

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A110a0
