Product Name:

Optically coupled isolator

Special Features:

10-72 hermetically sealed package; 1 kvdc electrical isolation; high current transfer ratio; consists of an infrared emitting diode and an npn silicon phototransistor; -55 to 125 degrees c operating and -65 to 150 degrees c storage temperatures

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23900
