Inclosure Material:

Plastic

Overall Length:

1.240 inches

Overall Diameter:

0.284 inches

Function For Which Designed:

Visible light emitting

Voltage Rating In Volts Per Characteristic:

14.0 on-state voltage, dc

Current Rating Per Characteristic:

19.00 milliamperes base current, dc nanoamperes

Color Tone Produced Per Source:

Green semiconductor

Luminous Intensity:

67.0 millicandela

Special Features:

9/32 inch mounting diameter and indium gallium aluminum phosphide is the semiconductor material

Terminal Type And Quantity:

2 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A110a0
