Overall Length:

4.500 inches

Overall Width:

4.500 inches

Character Type:

Alphanumeric and light bar

Voltage Rating:

120.0 volts

Character Quantity Per Line:

5

Line Quantity:

1

Display Type:

Light emitting diode

Display Color:

Red

Special Features:

^s^ in the 14th^position on all items stands for `special^ miscellaneous options. Same as previously provided to government: ruggedized mils901/milstd-167 designed bg241, conformal coating, push buttons under front cover, splashproof cover with hi-shock back plate, tag each unit with calibration sticker. All relays are not shockproof tested or military approved.There are no calibration adjustments on this instrument; therefore the meter is being ship without rs-485 communication (c in the p/n provided)and with a decimal point, because the decimal point no longer appears in the supervisor menu (since the position is fixed) and the customer won^t be able to make any changes to the instrument.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
