Application Design:

Waveguide

Overall Length:

1.750 inches

Overall Height:

0.500 inches

Overall Width:

1.000 inches

Voltage Standing Wave Ratio:

1.10 and 2.00

Power Rating:

250.0 kilowatts average

Overall Attenuation Range In Decibels:

+0.0/+70.0

Attenuation Variation Method:

Continuous

Frequency Range:

Between 8.600 gigahertz and 9.500 gigahertz

Overall Attenuation Accuracy In Decibels:

-0.70/+0.70

Special Features:

Terminal mtd w/mtg holes

Terminal Type And Quantity:

2 flange

Fsc Application Data:

Range calibrator set

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A223a0
