Special Features:

Shelf Life:

Fiig: A19800

Used in the testing of various power supplies by providing a load which will simulate actual in system performance; the load will accept voltages of 5 to 250v with an adjustable current capacity of 0.5 to 20 amperes; a visual readout of voltage and current is provided; power dissipation: no peak dissipation rating, 0 to 500 w variable non disspiation ration, dc oper freq, no imped rating; 2 connectors; 24.81 inches long; bench mounted, portable
