Radiation Pattern:

Bidirectional single antenna element

Beam Scanning Method:

Tilting single antenna element or rotating single antenna element

Positioning Device Type:

Drive motor single antenna element

Voltage Rating In Volts:

115.0 ac single antenna element

Design Type:

Truncated paraboloid single antenna element

Mounting Method:

Base

Special Features:

400 hertz, 3 phase

Fsc Application Data:

Antenna, radar equipment, except airborne

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A074a0
