Overall Length:

6.000 inches

Overall Height:

4.000 inches

Overall Width:

6.000 inches

Frequency Rating:

Between 2700.0 megahertz and 2900.0 megahertz

Special Features:

Attenuation to be 3.0 db; cadmium plate and chromate externally; pressure test at 80 psig

Material:

Brass

Material:

Copper alloy

Fsc Application Data:

Antennas, waveguides, and related equipment

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T224-a
