Overall Length:

3.750 inches

Overall Width:

3.750 inches

Impedance Rating In Ohms:

50.0

Frequency Rating:

Between 400.0 megahertz and 500.0 megahertz

End Application:

Test bench set, radar an/apm-202

Special Features:

Avg power rating 6.0 kw; insertion loss 0.04 db max; vswr 1.02; male flanges each end

Material:

Copper alloy

Material:

Copper alloy

Fsc Application Data:

Antennas, waveguides, and related equipment

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T224-a
