Frequency Rating:

2200.000 megahertz second antenna and 2400.000 megahertz second antenna

Radiation Pattern:

Omnidirectional all antennas

Beam Scanning Method:

Rotating all antennas

Positioning Device Type:

Drive motor all antennas

Component Quantity:

2

Voltage Rating In Volts:

115.0 ac all antennas

Design Type:

Corner reflector all antennas

Mounting Method:

Base

Fsc Application Data:

Direction finder set, radio navigation, airborne

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A074a0
