Application Design:

Transmission line

Overall Attenuation Range In Decibels:

+0.0/+11.0

Attenuation Variation Method:

Stepped

Step Position Quantity:

11

Attenuation Per Step In Decibels:

1.0

Frequency Range:

Between 0.000 hertz and 12.000 gigahertz

Impedance Rating In Ohms:

75.0 input-output

Special Features:

Clockwise rotation adds attenuation

Fsc Application Data:

Radio set, radio, except navigation and home type, nonairborne

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A223a0
