**Application Design:**

Transmission line

**Overall Attenuation Range In Decibels:**

+0.0/+11.0

**Attenuation Variation Method:**

Stepped

**Step Position Quantity:**

11

**Attenuation Per Step In Decibels:**

1.0

**Frequency Range:**

Between 0.000 hertz and 12.000 gigahertz

**Impedance Rating In Ohms:**

75.0 input-output

**Special Features:**

Clockwise rotation adds attenuation

**Fsc Application Data:**

Radio set, radio, except navigation and home type, nonairborne

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A223a0
