Overall Length:

4.750 inches

Overall Width:

1.940 inches

Frequency Rating:

Between 70.0 megahertz and 80.0 megahertz

End Application:

Missile guidance and tracking set

Usage Design:

For radar set group

Special Features:

Max vswr 1.3 to 1; 45.0 degrees bend along length

Material:

Any acceptable

Fsc Application Data:

Antennas, waveguides, and related equipment

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T224-a
