End Application:

An/aps-133 radar set, e4b acft

Beam Scanning Method:

Oscillating single antenna element

Design Type:

Parabolic single antenna element

Mounting Method:

Base

Supplementary Features:

Operating frequency 9375 mhz and 9310 mhz (x-band); scan rate 14 scans per minute; type of scan is sector; part of rdr-1fb system

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A074a0
