Electrical Dummy Load - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/5985-01-222-9224

Overall Length:

1.500 inches

Impedance Rating In Ohms:

50.0

Overall Diameter:

Between 0.620 inches and 0.660 inches

Frequency Range Rating:

+0.000 to 12.000 gigahertz

Fragility Factor:

Moderately rugged

End Application:

1430-01-087-6330 radar set

Power Rating:

2.000 watts average

Termination Type:

Connection coaxial

Operating Position:

All positions

Rf Connector Changing Feature:

Not included

Cooling Method:

Self-cooled

Special Features:

Inner shell and center conductor beryllium copper; outer shell and bead chain brass; plating is copper, nickel, and gold as applicable

Precious Material And Location:

Inner shell and center conductor surfaces gold

Precious Material:

Gold

Style Designator:

Coaxial mounted

Fsc Application Data:

Antennas, waveguides, and related equipment

Shelf Life:

N/a

Unit Of Measure:

Demilitarization:

No

Fiig:

A19800
