Application Design:

Waveguide

Body Style:

Waveguide type

Overall Length:

5.900 inches

Overall Height:

6.400 inches

Power Rating:

100.0 milliwatts peak

Insertion Loss At Minimum Attenuation In Maximum Decibels:

0.6

Overall Attenuation Range In Decibels:

+0.0/+50.0

Attenuation Variation Method:

Stepped

Frequency Range:

Between 33.000 gigahertz and 50.000 gigahertz

Functional Description:

Rotary-vane attenuator

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A223a0
