Overall Length:

39.000 inches

Overall Width:

13.000 inches

End Application:

Automated radio theodolite system (art-1, 1r, 2, 2r)

Component Type And Quantity:

1 antenna and 1 motor and 1 conductor and 1 plate and 1 tube

Special Features:

Component type and quantity: eccentrically revolving hemisphere 1; joint electronic type designation system name and p/n: antenna p/n as-462a/gmd-1; mounting configuration: six 0.312 in. Captivated mtg screws equally spaced on 12.375 in. Centers; fsc application data: meteorological instruments and aparatus

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:
