## NSN 5985-01-302-0913

Radio Frequency Transmission Line - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/5985-01-302-0913 **Overall Length:** 0.875 inches **Outside Diameter:** 0.200 inches **Conductor Size:** 16 awg **Characteristic Impedance In Ohms:** 50.0 **Conductor Quantity: Conductor Material: Brass Operating Voltage Rating:** 335.0 volts **Outer Conductor:** Not included **Terminal Fitting:** Included **Accommodated Conductor Type:** Coaxial **Conductor Surface Treatment:** Gold plated **Tubing Outside Diameter:** 0.200 inches **Center To Center Distance Between Conductors:** Between 0.843 inches and 0.875 inches **Precious Material And Location:** Contact surfaces gold **Precious Material:** Gold **Fsc Application Data:** Antennas, waveguides, and related equipment Shelf Life:

N/a **Unit Of Measure: Demilitarization:** No Fiig: T224-e
