Overall Length:

7.250 inches

Overall Height:

8.500 inches

Mounting Hole Quantity:

4

Frequency Rating:

136.000 megahertz single antenna element and 174.000 megahertz single antenna element

End Application:

Airborne radio sets, an/arc-18 (v), an/arc-186(v)

Characteristic Impedance In Ohms:

50.0 single antenna element

Mounting Method:

Threaded hole

Functional Description:

An airborne antenna used for voice communications

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A074a0
