| Overall Length:                          |
|--|
| 22.000 inches                            |
| Mounting Configuration:                  |
| Flange                                   |
| Radio Frequency Rating:                  |
| Between 8.2 gigahertz and 12.4 gigahertz |
| Unit Type:                               |
| Coaxial line and waveguide               |
| Material:                                |
| Aluminum alloy                           |
| Material:                                |
| Aluminum alloy                           |
| Shelf Life:                              |
| N/a                                      |
| Unit Of Measure:                         |
|  |
| Demilitarization:                        |
| No                                       |
| Fiig:                                    |
| Т389-с                                   |
