Overall Length:

5.400 inches

Overall Height:

1.800 inches

Overall Width:

2.560 inches

Special Features:

Precision machined housing, stepper motor, precision gears, shafts, bearing and miscellaneous hardware

Functional Description:

Used to accurately position the tuning mechanism of the uhf filter assembly to the desired rf frequency set by the radio control panel

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
